

Medicare National Coverage Determination (NCD)

Topic: National Coverage Determination (NCD) for Screening for the Human Immunodeficiency Virus (HIV) Infection (210.7)

Decision: CMS has determined that the evidence is adequate to conclude that screening of HIV infection for all individuals between the ages of 15-65 years is reasonable and necessary for early detection of HIV and is appropriate for individuals entitled to benefits under Part A or enrolled in Part B.

What this means: Effective for claims with dates of service on and after April 13, 2015, and later, the Centers for Medicare & Medicaid Services (CMS)

For more information, contact Customer Service at the number listed on your ID card.
