Rapid Cycle Improvement

The Performance Improvement Projects (PIPs) are a structured process in a rapid cycle format aimed at targeted opportunities for improving health outcomes.

- 2 year projects; July 2018 to June 2020
- 5 modules (phases)
  - Mod’s 1, 2, & 3 are mostly administrative. Gathering information, determining project focus, planning the interventions.
  - Mod 4 is the implementation and testing phase (longest portion of the project)
  - Mod 5 is the analysis and final report

PIPs are a requirement in the RAE Contract.
Identified Practices and PIP focus

**PRIME**
- Improve SUD Treatment through MAT ages 18 and older
- Foresight Family Practice, GJ

**RAE / CHP+**
- Improve WCV rates for ages 15-18
- Mountain Family Health Center, GWS

**RAE**
- Increase depression screening ages 11 and older
- Colorado Mountain Medical, Avon
Current Status of the PIPs

All 3 practices have submitted the Module 3 documentation. Once approved each will move into the Implementation and testing phase to improve the overall outcome.

• **FFP is partnering with Mind Springs along with internal BH providers to engage Members in MAT treatment that are diagnosed with AUD or OUD within 60 days, exploring Peer Support services and re-engaging Member and family in treatment.**

• **MFHC is targeting 15 – 18 year old Members that are due for their WCV. Registry development for outreach, texting campaigns, and internal staff education with workflow improvements.**

• **CMM is implementing PHQ-9 depression screenings for Members at the Wellness and Preventive visits. Recently received new screening software to make this efficient for both Members and staff and more streamlined for Providers to review and evaluate results with the Member.**
